

## TRACK RECORD

# The operating record

What exists, dated and checkable. No testimonials, no invented clients — the ledger itself is the evidence.

The record so far

- **39 research reports** generated from the peer-reviewed literature, each with works cited.
- **73 venture concepts** audited against the seven-gate framework and the independent red-team audit.
- **20 dossiers for sale**, priced by a computed Deal Value Score, each delivered with its full economics and its audit warnings.
- **Every rejection published in full** — the graveyard is a searchable taxonomy of why things fail, not a list of wins.
- **One complete sample dossier**, free and indexable, with the audit's own objections printed inside it.
- **2682 references** across the corpus, 469 with DOIs, so the claims can be checked against the papers.

## What has not happened yet

This is a young operation, and the record is honest about it. We have not yet shipped a dossier to a paying subscriber, and none of the audited concepts has yet been licensed or built into an operating company by a buyer. No success stories are claimed. The only performance evidence is the published method, the published rejections, and the sample dossier you can read in full before paying anything.

## How to verify us

Take any published rejection or the free sample, follow its citations to the underlying papers, and recompute the economics yourself from the primitives the dossier states. The method is designed so that a skeptical reader — human or machine — can check the work without taking our word for it.

Published for research and educational purposes. Nothing here is investment, legal, regulatory or engineering advice, and no commercial outcome is promised or implied. Concepts are drawn from published scientific literature and have not been commercially validated; several involve chemical, biological or regulated processes that require appropriate expertise, facilities, permits and safety controls. Independently verify every figure, citation and regulatory requirement before committing capital.
